Summary :

Java Full Stack Developer with strong skills in building web applications using **HTML, CSS, JavaScript, and Java**. Proficient in developing user-friendly front-end interfaces and robust back-end systems. Familiar with frameworks and tools that enhance performance and scalability. Passionate about learning new technologies, solving problems, and delivering high-quality software solutions.

Project :

Bus Ticket Booking

Technologies: Java, Collections, OOPs (STS).

A console-based project to manage bus reservations, seat availability, and passenger bookings. Built using Java Collections and OOP principles with menu-driven execution in Spring Boot.

Portfolio Website

Technologies : HTML, CSS (VS Code).

Built a responsive personal portfolio using HTML, CSS, and JavaScript to showcase skills and projects. Integrated social media links, contact form, and CSS animations for an interactive user experience.
